Safe Ageing No Discrimination

LESBIAN, GAY, BISEXUAL, TRANS

We aim to

work with older LGBT people to identify and address the issues that arise for them

work with a whole range of organisations to find solutions and improve services

influence commissioners, the Care Quality Commission, and others to spearhead better practice

Contact us if you are:

- An older LGBT person happy to be interviewed about your experiences - and hopes and fears of care provision
- A care home provider/matron/support worker happy to talk to us about your needs and provisions
- Passionate about equalities and knowledgeable about health and social care policy
- Willing and able to help us do our research

Imagine an older person living in a care home, or accessing care support who feels unable to talk about their life, their experiences, memories, hopes, family and relationships.

SAND is a new group that is looking specifically at issues that effect older lesbian, gay, bisexual or trans (LGBT) people accessing care and support services.
